

Basic Plumbing Studies

16-19

Adult

This is a one-year Level 1 introductory course to plumbing, teaching you the essential health & safety practices you will need to work in a trade profession.

Often called upon in an emergency, if you can fix a leaking pipe, mend a broken toilet, or repair a central heating system, you will be hailed a hero. An experienced plumber should have the ability to work in a variety of different environments and during your time with us we will teach you the practical, hands-on skills and industry legislation to enable you to do this, either as an employee or running your own business.

We offer both full-time study and apprenticeship options for you to train to be a professional plumber. We offer this Level 1 introductory year if you do not have the required grades to start at Level 2.
