

FdSc Marine Biology with Conservation degree

University

To us at Newquay University Centre Cornwall College, there's nothing more exciting or enigmatic than our oceans. With so much still undiscovered, our marine habitats are the last of the wild frontiers left to explore. And with human impact on our underwater world at an all-time high, now is the crucial time to better understand and protect it. Our oceans need people who feel a shared desire to get involved with the big issues that we're facing. To use science to challenge the status quo. To promote progressive change in the people around them through education and positive action.

For over 20 years, Cornwall College Newquay has inspired thousands of students to make that all-important difference, using their passion as a guide.

Where else will you find such a wide range of aquatic habitats within walking distance of where you study? There's wild and rugged headland, sheltered coves, freshwater streams, saltmarsh and sprawling estuaries. You'll be living with a Marine Conservation Zone in your back yard. Not to mention, the even wider variety of habitats accessible to you just a short drive away.

This unique location has cultivated a vibrant conservation community to match the surroundings, and your passion for the sea will be in good company. Students can take their pick of what to get involved in, benefiting from our strong ties with likeminded groups, charities and businesses such as Blue Reef Aquarium, Cornwall Wildlife Trust, Cornwall Seal Group Research Trust, Newquay Marine Group, British Divers Marine Life Rescue and many more.

So, what are you waiting for? There's never been a more important time for you to explore your passion for the science of the sea. Take your next step here in Cornwall and join Generation Restoration.

This course is also available to study part-time over three years.

A brochure can be downloaded at <https://www.cornwall.ac.uk/wp-content/uploads/2022/05/Marine-biology-with-conservation-approved.pdf>

This course is also offered with a Science Gateway option if you would like to study FdSc Marine Biology with Conservation but don't have the right qualifications or grades
