

Standards Apprenticeship – Engineering Operations

THE PLYMOUTH
ENGINEERING
SKILLS
CENTRE

THE CORNWALL COLLEGE GROUP

Apprenticeship

This Level 2 apprenticeship is ideal if you want to start your journey to becoming a qualified engineer. The apprenticeship route provides an ideal foundation for a wide range of skills within the engineering field.

You will learn a range of practical skills, be able to follow technical drawings and work carefully and methodically. The course is 75% practical workshop based with 25% classroom theory work. You will have to complete a range of practical assessments to a high standard alongside reports that detail what you have done and whether you met the required standard.

All training is provided by ex-industry experts with many years within their field to guide you through your learning and assessment within the course.

Units include:

- Health and safety
- Engineering environmental awareness
- Fabrication
- Welding
- CAD design
- Hand fitting
- Turning and Milling machining

Once you have completed the two qualifications (Skills and Knowledge) you will progress to an End Point Assessment, where you will be assessed on your skills and knowledge over a range of tasks and an interview.

We have award-winning partnerships with many world-class organisations in Cornwall, See career progression tab for a list of current apprentice locations.

To ensure you gain all the skills needed for a career as an engineer, you will need to start your apprenticeship at Level 2. On successful completion you can go into employment or continue on to our Level 3 standards apprenticeship in Welding/fabrication, fitter or machinist pathways.
