

Introduction to Access Photography

Leisure and Professional

This exciting course will introduce you to the basic principles of photography, you will gain an understanding of the exposure triangle, using the ISO, Aperture and Shutter Speed to find the perfect exposure.

You will also explore compositional guidelines enabling you to create amazing images.

This course is perfect if you are just starting out in photography or would like to develop your skills further. You will also gain understanding of the use of light with shadows and contrast and how to use natural light effectively, the use of colour and processing images in the darkroom.

You will be given the chance to take part in small workshop set ups to experiment with close up photography and refraction.

You will require your own DSLR or Mirrorless Camera, SD card and Memory Stick to sign up to the Course.

£5 material fee
