

Level 2 T Level Foundation Year - Health

16-19

If you want to make a positive difference to someone's life by contributing to their health, happiness and wellbeing then a career in Health and Social Care is the choice for you.

This foundation programme will allow you to gain all the necessary skills, experience and knowledge to progress on to a T-Level in Health or an appropriate apprenticeship. With a focus on Biology, Anatomy and Physiology, as well as an emphasis on social care, and the skills you will need to succeed, this course is designed for students who are not yet ready to take on a T Level programme. During this year you will have a chance to achieve grade 4's in your Maths and English GCSE's, build resilience and communications skills, as well as confidence and vital knowledge.

The course aims to help you enhance the skills you already possess and develop others such as the ability to treat people with dignity, empathy and excellent time management.

Studying the course will introduce you to some of the practices being used within health and social care settings such as hospitals, care homes and children's centres. This will include person-centred care, infection prevention and communication strategies and could be developed in the classroom, equipped clinical room or work placement.
