

Environmental Practitioner Degree Apprenticeship

Apprenticeship

University

This occupation is found in a broad and growing employment sector, with organisations of all types seeking to promote sustainable growth in a manner that is practical whilst responsible, using fewer natural resources, producing less waste, and without compromising the quality of the built and natural environment.

Once confined to conservation, waste management or pollution prevention, the occupation has become more mainstream, infiltrating into many areas of the business world.

Environmental Practitioners are employed in a wide variety of job roles across many sectors including:

- the voluntary and charity sectors;
- public sector including regulatory bodies, local and national authorities;
- educational institutions and research agencies; and
- Private sector companies; ranging from multinational companies to smaller business requiring environmental practitioners

The broad purpose of the occupation is to provide employers with a high level of professional environmental expertise, whilst providing a robust overview of key issues and the relevant policies, regulations and legislation an organisation must consider when delivering a specific project or programme.

Environmental Practitioners will combine a high level of knowledge and understanding of environmental principles and techniques to complex environmental systems, with their expertise being developed, adaptable or transferable to a range of environmental specialisms, for example, environmental policy and legislation, air quality, climate change, energy, water resources, waste management, ecology, acoustics, land contamination, sustainability, landscape or heritage.

In combining the Environmental Resource Management Degree with the Standards for environmental practitioner, Newquay University Centre have developed a broad delivery on this standard which encompasses the high level and dynamic work of an environmental practitioner. Delivered in Block weeks and online once a week, this course ensures that apprentices are not only supported but also have intensive
